PROFESSIONAL SUMMARY

Software engineering apprentice - B.Tech Computer Science 2025 with hands-on application development in **Java and Python**, from enterprise-style domain modelling (an Online Banking System simulating core banking operations) to full-stack web and data-driven analytics. Strong computer science fundamentals (data structures, OOP, DBMS, networking), a multi-model ML capstone, and interactive Power BI dashboards. Data-driven and curious by habit - building toward enterprise platforms, APIs, and customer-facing applications.

CORE COMPETENCIES

Java

Python

SQL & Databases

REST APIs

Object-Oriented Programming

Data Structures & Algorithms

Machine Learning

Full-Stack Web

WORK EXPERIENCE

Resolence

Aug 2026 - Present

Software Engineering Intern

Hyderabad

- Building backend and full-stack applications with Python and Java, applying CS fundamentals and version-controlled development (Git/GitHub) to production-facing work.

PROJECTS

Online Banking System

Open Source

Python-based system simulating core banking operations - account management and financial workflows, built for the financial-services domain.

Python

Hotel Management System

Console application with room reservations, food ordering, billing, and serialization persistence; multi-room management with customer data.

Java, SQL

Stock Market Volatility - Multi-Model ML Capstone

Time-series ML capstone: data preparation, feature engineering, multi-model comparison, and evaluation on stock market prediction.

Python, Pandas, NumPy, Scikit-learn

Unicorn Companies Analysis

Interactive Power BI dashboard analyzing global unicorn companies (startups valued over \$1B) across countries, industries, and funding patterns.

Power BI

EDUCATION

B.Tech - Computer Science

SR University

2025

Telangana, India

CERTIFICATIONS

Data Analytics

Codegnan IT Solutions Pvt Ltd, Hyderabad

2025
