## PROFESSIONAL SUMMARY

Computer Science graduate (SR University, 2025) building business applications in Java and Python with SQL. Hands-on experience across application development, testing, and debugging on projects ranging from a Java console hotel management system to a Python online banking system. Combines strong software engineering fundamentals with data-driven problem solving to deliver working, maintainable applications.

## CORE COMPETENCIES

Java Application Development

Python Programming & Scripting

SQL & Database Management

Testing & Debugging

Business Application Development

Data Analysis & Visualization

## WORK EXPERIENCE

Resolence

Aug 2026 - Present

Intern

Hyderabad

- Applying programming and debugging skills to real-world software delivery in a team environment

## PROJECTS

Hotel Management System

Console application for business application development featuring room reservations, food ordering, billing, and data persistence using serialization; supports multiple rooms across various room categories with customer management.

Java

Online Banking System

Python-based system simulating core banking operations, demonstrating domain logic and transaction workflows relevant to financial services application development.

Python

Stock Market Volatility - Multi-Model ML Capstone

Academic Research

Time-series capstone applying multi-model machine learning to stock market predictions; documented evaluation of model performance across conditions.

Python, Jupyter Notebook

Unicorn Companies Analysis

Data visualization project analyzing global unicorn companies (startups valued over \$1B), highlighting trends across countries, industries, and funding patterns.

Power BI

## EDUCATION

B.Tech - Computer Science

SR University

India

2025

## CERTIFICATIONS

Data Analytics

Codegnan IT Solutions Pvt Ltd, Hyderabad

2025

Data Base Management System

NPTEL

2024

Leadership and Followership

The Open University

2024

## SKILLS

---

**Languages:** Java, Python, SQL, JavaScript    **Backend & Data:** Django, REST APIs, Machine Learning, NumPy, Pandas, Scikit-learn

**Database:** SQL, Database Management Systems (NPTEL)    **Data & Analytics:** Power BI, Excel, Data Visualization, Jupyter Notebook

**Tools & Platforms:** Git, GitHub, Codespaces, Linux CLI
