PROFESSIONAL SUMMARY

Associate Software Engineer aspirant targeting application engineering and enterprise platform support. B.Tech Computer Science graduate (SR University, 2025) with Python, SQL, REST API, and Microsoft Excel proficiency, strong software engineering fundamentals (data structures, OOP, DBMS, OS, networking), and hands-on data analytics with Pandas and Power BI. Applied multi-model machine learning to stock-market volatility in a time-series capstone, and shipped end-to-end Java and Python applications with real persistence logic. Fast, self-directed learner who built working analytics and ML skills within a single year, with an AI-first mindset backed by daily hands-on use of modern AI coding assistants across development and data work.

CORE COMPETENCIES

SQL & Database Fundamentals

Python Programming

REST APIs & Integrations

Microsoft Excel & Power BI

Data Processing & Analysis (Pandas)

Java & OOP Fundamentals

Machine Learning (Time-Series)

Git, GitHub & Linux CLI

WORK EXPERIENCE

Resolence Aug 2026 - Present

Intern

Hyderabad, India

- Professional internship applying Python and SQL to software and data delivery at a Hyderabad firm.
- Learning production workflows end-to-end while contributing to engineering and analytics tasks.

PROJECTS

Stock Market Volatility - Multi-Model ML Capstone ML Capstone

Time-series capstone applying **multi-model machine learning** to stock market volatility prediction - the full path from messy financial data to evaluated models.

Python, Jupyter, Scikit-learn, Pandas

Hotel Management System Java

Full console application handling room reservations, food ordering, billing, and **serialization persistence** across multiple room categories with customer management - enterprise-style business logic in miniature.

Java, OOP, Serialization

Unicorn Companies Power BI Dashboard Data Visualization

Interactive dashboard analyzing global unicorn companies across countries, industries, and funding patterns - turning raw data into decision-ready insight.

Power BI, Excel

Online Banking System Python

Python-based simulation of **core banking operations**, showing how I translate financial-domain concepts into working software.

Python

EDUCATION

B.Tech - Computer Science SR University

2025

Hyderabad, India

Computer Science and Engineering; coursework in data structures, OOP, DBMS, OS, and networking.

CERTIFICATIONS

Data Analytics	Codegnan IT Solutions, Hyderabad	2025
Data Base Management System	NPTEL	2024

SKILLS

Languages: Python, Java, SQL, JavaScript **Backend & Data:** Django, REST APIs, Machine Learning, NumPy, Pandas, Scikit-learn

Data & Analytics: Microsoft Excel, Power BI, Data Visualization, Jupyter Notebook

Tools & Platforms: Git, GitHub, Codespaces, Linux CLI
