PROFESSIONAL SUMMARY

Data Science / ML fresher - B.Tech Computer Science 2025 with an end-to-end multi-model time-series ML capstone (Stock Market Volatility prediction) built with **Python, Pandas, NumPy, and Scikit-learn**. Daily driver stack on Python and **SQL** (PostgreSQL, MySQL) across multiple projects, from data prep and feature engineering to model evaluation and reporting. Data-pipeline foundations in pandas/SQL with a fast-tracked **PySpark** learning path underway.

CORE COMPETENCIES

Machine Learning

Python

SQL & Databases

Pandas & NumPy

Scikit-learn

Time-Series Forecasting

Data Pipelines

Power BI

WORK EXPERIENCE

Resolence

Aug 2026 - Present

Software Engineering Intern

Hyderabad

- Building backend and full-stack applications with Python and Java, applying software engineering fundamentals to production-facing work.

PROJECTS

Stock Market Volatility - Multi-Model ML Capstone

Open Source

Time-series ML capstone: takes raw market data through preparation, feature engineering, multi-model comparison, and evaluation - the same data-to-model-to-decision arc as a data science role.

Python, Pandas, NumPy, Scikit-learn, Jupyter

Identifying Shopping Trends

Data analysis of shopping trends identifying consumer patterns, demonstrating end-to-end data analysis and insight reporting.

Python, Pandas, Jupyter

Unicorn Companies Analysis

Data visualization project analyzing global unicorn companies (startups valued over \$1B) across countries, industries, and funding patterns.

Power BI

Hotel Management System

Console application with reservations, food ordering, billing, and serialization persistence; multi-room management with customer data.

Java, SQL

EDUCATION

B.Tech - Computer Science

SR University

2025

Telangana, India

CERTIFICATIONS

Data Analytics	Codegnan IT Solutions Pvt Ltd, Hyderabad	2025
Database Management System	NPTEL	2024
Leadership and Followership	The Open University	2024

SKILLS

Languages: Python, Java, SQL, JavaScript

Data & ML: Machine Learning, Pandas, NumPy, Scikit-learn, Data Visualization, Jupyter Notebook

Data & Analytics: Power BI, Excel, SQL (PostgreSQL, MySQL) **Web & Backend:** Django, REST APIs, HTML, CSS, Bootstrap, React

Tools: Git, GitHub, Codespaces, Linux CLI
