PROFESSIONAL SUMMARY

Data Science & Software Engineering fresher - B.Tech Computer Science graduate (SR University, 2025) with hands-on experience in Python machine learning, quantitative modeling, and data analysis. Built multi-model ML systems for stock market volatility prediction using scikit-learn, pandas, and NumPy. Combines strong software engineering fundamentals (SQL, data structures, OOP) with data-driven problem solving - from predictive models to data visualization dashboards.

CORE COMPETENCIES

Machine Learning & Quantitative Modeling

Python ML Stack (scikit-learn, NumPy, Pandas)

SQL & Relational Databases

Data Visualization & Storytelling

Statistical Analysis

Data Pipelines & ETL

Jupyter & Exploratory Analysis

POC Development

WORK EXPERIENCE

Resolence

Aug 2026 - Present

Intern

Hyderabad

- Contributing to data handling, processing, and software development tasks in a professional environment

PROJECTS

Stock Market Volatility - Multi-Model ML Capstone

Capstone

Time-series capstone project applying multi-model machine learning to stock market volatility prediction. Designed and developed quantitative models using scikit-learn, processing historical market data with pandas and NumPy. Evaluated model performance across multiple metrics to identify optimal prediction strategies.

Python, scikit-learn, NumPy, Pandas, Jupyter Notebook

Unicorn Companies Analysis

Data Visualization

Interactive data visualization dashboard analyzing global unicorn companies (startups valued over \$1B) across countries, industries, and funding patterns. Built stakeholder-ready insights through data storytelling and visual analysis for non-technical audiences.

Power BI, Data Analysis

Identifying Shopping Trends

Data Analysis

Data analysis project identifying consumer purchasing patterns and trends using pandas for data processing and Jupyter for exploratory analysis. Generated visualizations to narrate data-driven stories about consumer behavior.

Python, Pandas, Jupyter Notebook, Matplotlib

Online Banking System

Backend

Python-based system simulating core banking operations with relational database integration, demonstrating data handling and persistence skills.

Python, SQL

EDUCATION

B.Tech - Computer Science SR University

2025

CERTIFICATIONS

Data Analytics

Codegnan IT Solutions Pvt Ltd, Hyderabad

Jul 2025

SKILLS

Languages: Python, Java, SQL, JavaScript

ML & Data Science: scikit-learn, NumPy, Pandas, Machine Learning, Statistical Analysis, Jupyter Notebook

Data & Analytics: Power BI, Excel, Data Visualization, Data Analysis

Backend & Databases: Django, REST APIs, SQL, Relational Databases **Tools & Platforms:** Git, GitHub, Codespaces, Linux CLI
